## How to use V2.14 GDS VCI Software for Hyundai & KIA Stored in 500G SATA

## Format HDD?

- 1. Insert the hard disks into laptop or EVG7 small computer.
- 2. Star the computer or laptop, you will see Blue Screen firstly, then comes with below picture:

Windows	failed to start. A recent hardware or software change might be the
cause.	
If Wind can he startu (use th	iows files have been damaged or configured incorrectly, Startup Repair p diagnose and fix the problem. If power was interrupted during , choose Start Windows Normally. he arrow keys to highlight your choice.)
La	anch start - Certain Liecommended
Second Descri	is until the highlighted choice will be selected automatically: 2 iption: Fix problems that are preventing windows from starting

3. Press "Ctrl+Alt+Delete" to restart laptop or computer , then press "F2" to" BIOS" system setting, different computer has different way to go into "BIOS", also need to press different button. Take DELL D630 as an example:

## 

4. After setting SATA to AHCI mode, then Save, restart the computer or laptop
